

# SLIDING ACCESS PANEL

## Features

- Fully Customizable sizes
- Rigid Aluminum Design

## Panel Summary

The Hot Aisle Containment Sliding Panel System enhances airflow in data centers with a durable aluminum frame and twin-wall polycarbonate panels. It contains hot air, reduces recirculation, and boosts cooling efficiency.

Sliding panels allow easy, space-saving access for maintenance without compromising airflow. The system is scalable and reconfigurable for evolving environments.

# SLIDING ACCESS PANEL

## Door Specs

Frame	Tensile Strength
Aluminum Extrusion	30,000 PSI
Inserts	Fire/Flame Rating
6mm Twin-wall Poly	ASTM E84 Class A

### Dimensions

Custom Sizing

### Warranty

- ✓ Limited lifetime warranty on aluminum extruded components
- ✓ Limited Two-year warranty on moving parts with approved vendor installation
